

REGULATORY INTELLIGENCE & FORESIGHT (RIF)

Strengthening How Regulators Identify, Interpret, Apply & Learn from Intelligence to Improve Decision-Making, Adaptation & Future Readiness **Regulatory Policy & Approach Practice Area**

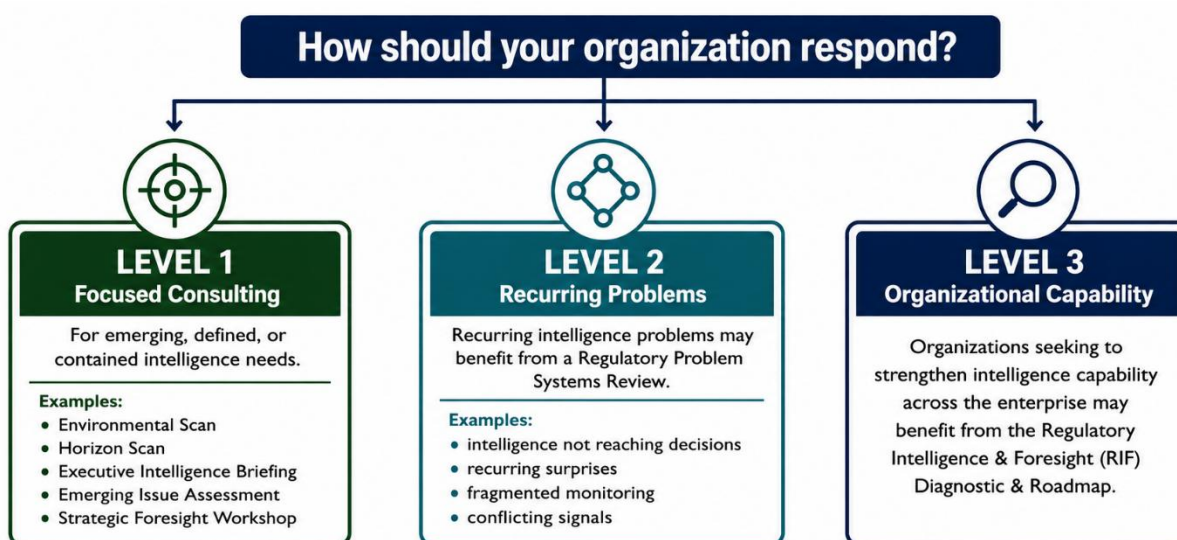

Most regulators actively monitor their environments through environmental scanning, stakeholder engagement, operational reporting, government relations, professional networks, strategic planning, and sector participation. Yet important developments can still emerge unexpectedly, meaningful signals may be overlooked, and opportunities recognized too late to influence decisions.

The Regulatory Intelligence & Foresight (RIF) practice area strengthens how organizations identify intelligence requirements, collect and interpret information, anticipate emerging developments, support decision-making, and build future readiness.

The RIF Diagnostic evaluates how intelligence activities, foresight, governance, organizational learning, and strategic decision-making function together as an integrated enterprise capability, identifying strengths, intelligence gaps, and practical priorities for improvement.

Common Organizational Challenges

- Important developments are identified too late to influence decisions.
- Intelligence activities are fragmented across the organization.
- Leaders receive large volumes of information but limited strategic insight.
- Governance discussions remain focused primarily on current issues rather than emerging risks and opportunities.
- Environmental scanning is inconsistent or informal.
- The organization wants stronger future readiness and anticipatory capability.

***Not every challenge requires the same response.
Choose the approach that best matches the nature and scope of the problem.***

Level 3 — Regulatory Intelligence & Foresight (RIF) Diagnostic & Roadmap

For organizations seeking to strengthen enterprise-wide intelligence and future-readiness capability.

The RIF Diagnostic evaluates how effectively organizations identify intelligence requirements, collect and assess information, translate intelligence into decision-ready insight, support strategic foresight, and continuously strengthen organizational awareness and future preparedness. The assessment identifies organizational strengths, intelligence gaps, governance opportunities, and future-readiness priorities while providing a practical roadmap for strengthening intelligence capability across the enterprise. It evaluates organizational maturity across four integrated dimensions.

The Diagnostic assesses four integrated dimensions

1. Intelligence Requirements, Sources & Collection

How effectively the organization identifies intelligence needs, develops ecosystem awareness, accesses reliable intelligence sources, and coordinates intelligence collection activities.

2. Intelligence Management, Assessment & Prioritization

How intelligence is organized, validated, assessed, prioritized, monitored, and translated into meaningful organizational insight.

3. Intelligence Application, Adaptation & Foresight

How intelligence supports governance, strategic planning, organizational adaptation, future preparedness, and decision-making.

4. Intelligence Governance, Capability & Organizational Integration

How intelligence activities are governed, evaluated, continuously improved, and embedded within organizational capability and learning.

You'll Receive

- Organizational maturity profile
- Key findings and recommendations
- Customized implementation roadmap
- Executive summary
- Optional implementation support

Designed for: Registrars and CEOs, executive leadership teams, strategy and planning leaders, policy and regulatory affairs leaders, risk, intelligence and performance leaders, innovation and modernization leaders, Boards and Councils, and organizations seeking stronger future-readiness and anticipatory capability.

See Earlier. Understand Better. Decide Smarter. Prepare More Effectively.
